Product

Domino Synchronizer for SuperOffice CRM

Requirements

DOMINO SERVER

Operating system (Server):	MS **Windows** Server 2003 or higher
Domino server:	7.0.4 FP1 or higher (32 bit or 64 bit version)
Ports:	Domino HTTP task must be bound to a **free port**. (Normally this is port 80 but other ports can be configured.)
HTTP:	Domino **HTTP task** must be turned on; **Domino HTTP** must be used to serve HTML (no third party HTTP engines are supported).
Protocol:	**HTTP only**. (SSL not supported)
User mail files:	User mail files must be physically **located** on the Domino server where the synchronizer is installed.
Notes Client:	n/a

SUPEROFFICE SERVER

Operating system (Server):	MS Windows Server 2003 or higher *)
Database platforms:	MS SQL Server 2000 or higher Oracle 10.x *)
SuperOffice CRM Windows:	Version **6.x or higher**
Firewall:	Do not block the Firewall TCP port **8040**. This is used by the Domino server to communicate with the SuperOffice connector.
Note:	The Domino Synchronizer Admin requires a local SuperOffice for Windows installation. At least one user with access to SuperOffice for Windows is required. To create the database tables a **user name** and **password** of a database system administrator is required.

**) According to the standard requirements of SuperOffice CRM, please consult your SuperOffice partner.*

CUSTOMER NEEDS TO PREPARE THE FOLLOWING BEFORE THE TASK BEGINS:

- Administrator access to the Domino environment
- Person responsible for the Domino environment must be available
- The installation will demand a restart of the Domino server application.
- A server ID or an Administrator ID that has access to all the mailboxes must be used to sign the Domino Synchronizer Notes databases (at least editor with delete)
- Access to a server where the Domino Synchronizer will be installed
- Administrator access to the server
- Access to a client PC with both SuperOffice and Lotus Notes clients installed. (This will be used to test the solution, so an user id and password are required for SuperOffice and Lotus Notes)
